

Appendix 1: Anticipatory Guidance Topics

Note: All of the below topics may not be appropriate for each family. The provider should make a decision based on assessment of needs and observations. However, the Department's recommendations for minimal area(s) to be addressed are included in the text to follow. There are some areas that should be assessed initially and then visited only periodically or if the family has moved or otherwise changed.

Newborn:

Importance of Healthy Kids (EPSDT) visits and immunizations
Signs and symptoms of illness, e.g., neonatal jaundice, instruct when and how to contact doctor
Common questions and concerns of parents
Sleep position based on current standards of practice
Diapering, rashes and infant hygiene including circumcision and umbilical care
Thermometer use, temperature ranges that need to be called to doctor
Importance of car safety restraints
Home safety and injury prevention, e.g. crib safety, bath temperature, smoke detectors, microwave/bottle temperature, gun safety if applicable
Gratification of infant's need for contact, e.g., holding, rocking, interacting
Ways to calm infant, e.g., quiet infant with paroxysmal fussiness or colic
Infant individuality, e.g., differences in infant temperament
Prepare for possible sibling reactions
Breast-feeding or bottle-feeding, stress benefits of and resources for breast-feeding, as appropriate
Good parenting practices, availability of parenting classes and how to deal with unwanted advice
Postpartum adjustment, discuss range of postpartum difficulties including "blues" and depression
Family planning needs of mother
Parental tobacco, alcohol and drug use; risks to infant
Available resources, e.g., WIC, Family Case Management, transportation, Early Intervention

2 - 4 Weeks:

Importance of next EPSDT visit, including beginning immunizations
When and how to call doctor - recognizing early signs of illness
Injury prevention for age, e.g., never leave baby alone with young siblings or pets, proper infant restraint/car seat use, sun exposure
Diapering, rashes and infant hygiene
Sleep patterns and positions
Bladder and bowel habits
Infant development and milestones
Encourage infection prevention
Guidance about crying
Gratification of infant's basic needs
Types of infant stimulation and its importance
Development of baby's cognitive abilities
Child care providers, e.g., what to look for in "good" child care
Discuss nutrition and fluoride needs
Burping techniques and spitting up

Encourage parents to spend time together, need for attention to other children
Family planning needs of mother
Parental tobacco, alcohol and drug use - risks to infant
Available resources, e.g., WIC, Family Case Management, transportation, emergency resources , Early Intervention

2 months:

Importance of next EPSDT visit, including immunizations
Injury prevention, e.g. , never leave baby alone with young siblings or pets, proper infant restraint/ car seat use, sun exposure
Diapering, rashes and infant hygiene
Sleep patterns and positions
Early signs of illness
Outline what to do in an emergency
Developmental issues and milestones
Age-appropriate stimulation
Importance of infant-parent interaction
Play with toys, parents, siblings, others
Child care issues
Feeding instructions, e.g., delaying solids, no honey
Family relationships
Family planning needs of mother
Parental tobacco, alcohol and drug use, risks to infant
Available resources, e.g., WIC, Family Case Management, transportation, emergency resources, Early Intervention

4 months:

Importance of next EPSDT visit, including immunizations
Injury prevention for age, e.g., rolling, falling, bath and bottle temperature, never leave baby alone with young siblings or pets, proper infant restraint/car seat use, sun exposure
Diapering, rashes and infant hygiene
Sleep position
Development issues and milestones
Discuss “spoiling”
Stranger awareness
Good and appropriate child care
Emphasize family strengths
Good parenting practices, e.g., holding and rocking infant, responding to infant, reading to infant
Nutrition and oral hygiene, no bottle to bed
Parental tobacco, alcohol and drug use, risks to infant
Maintain community ties, e.g., religious, cultural, recreational, social
Family planning needs of mother
Available resources, e.g., WIC, Family Case Management, transportation, Early Intervention

6 months:

Importance of next EPSDT visit, including immunizations
Injury Prevention - baby proof home, never leave baby alone with young siblings or pets, proper infant restraint/car seat use, sun exposure

Toy safety
Diapering, rashes and infant hygiene
Sleep patterns and position
Need for shoes
Discuss care of URI's, diarrhea, dehydration, irritability
Developmental issues and milestones, refer as necessary
Need for answering all cries within a reasonable amount of time
Stranger anxiety
Age-appropriate stimulation, encourage play with age appropriate toys
Discuss and observe parent-child relationships - read to baby, social games, exploration
Nutrition, no bottle to bed
Teething/drooling/oral hygiene
Good parenting practices, e.g., need for consistency, age appropriate discipline
Family planning needs of mother
Parental tobacco, alcohol and drug use; risks to infant
Available resources, e.g., WIC, Family Case Management, Early Intervention, transportation, emergency resources

9 months:

Importance of next EPSDT visit, including immunizations
Injury prevention, child safe house, e.g., car safety, poisons, sun exposure, stair safety and infant safety gate; upgrade to a new (toddler) car restraint seat when the infant weighs 20 pounds
Discuss learning infant/child CPR
Diapering, rashes and infant hygiene
Sleep practices
Shoe types and fit
Developmental issues and milestones
Signs and symptoms of illness
Separation protests/stranger anxiety
Child care providers/issues
Nutrition and oral hygiene, e.g., table foods and cup, avoid choking foods, no bottle in bed, early childhood caries
Good parenting practices, e.g., social games, stimulus control, routines
Emphasize family strengths, explore range of parental supports
Family planning needs of mother
Parental tobacco, alcohol and drug use; risks to infant
Available resources, e.g., WIC, Family Case Management, transportation, Early Intervention, emergency resources

12 months:

Importance of next EPSDT visit, including immunizations
Diapering, rashes, infant hygiene, delaying toilet training
Accident prevention: child proofing home, climbing, car seat use, sun exposure, safety gates, safety plugs
Sleep/separation problems, bedtime ritual
Developmental milestones, refer as necessary
Signs of illness and what to do in emergency situation
Speech development; talk to baby

Age appropriate stimulation, e.g., reading to child, playing games, singing, talking
Show affection—pick up, hold, cuddle, love
Child's need for autonomy and expression of curiosity
Child care and caregiver issues
Consistency in discipline, e.g., use of praise and reassurance
Nutrition, e.g., mashed table foods, plans to discontinue bottle, choking hazards, anticipate decrease in appetite, whole milk
Fluoride as necessary, dental hygiene, early childhood caries - visit to dentist
Emphasize family strengths, explore range of parental supports
Family planning needs of mother and spacing of children
Parental tobacco, alcohol and drug use; risks to child
Available resource, e.g., WIC, transportation, Early Intervention, emergency resources

15 months:

Importance of next EPSDT visit
Injury prevention, e.g., poisons, falls, stoves, tubs, electrical outlets, car seat use, sun exposure/sunscreen, safety gates, safety plugs, child proof home
Sleep practices; regular bedtime rituals
Toilet training readiness
Developmental milestones
Developmental issues: curiosity, interest in peers, intellectual development
Separation protest
Discipline, limit setting and the use of positive reinforcement
Choosing and evaluating day care options
Nutrition and oral hygiene, early childhood caries, fluoride, appropriate snacks, self-feeding
Good parenting practices, e.g., talk, sing and read with toddler, appropriate television watching
Emphasize family strengths, explore range of parental supports
Family planning for teenage parents
Parent/caregiver use of tobacco, alcohol and drugs; risks to child
Available resources, e.g., WIC, Early Intervention, transportation, emergency resources

18 months:

Importance of next EPSDT visit, immunizations
Injury prevention, e.g., childproof home, balloons, plastic bags, car seat use, safety gates, safety plugs
Sleep practices, discuss night fears
Toilet training readiness
Development issues and milestones
Discipline - positive reinforcement and praise
Self-comforting behaviors
Temper tantrums
Choosing and evaluating day care or preschool
Nutrition, e.g., choking hazards
Oral care, e.g., early childhood caries, fluoride, brushing teeth
Emphasize family strengths, explore range of parental supports
Good parenting practice, e.g. limit child's use of TV, family communication, provide choices
Parental educational opportunities
Parental/caregiver use of tobacco, alcohol and drugs, risks to child
Available resource, e.g., WIC, Early Intervention, transportation, emergency resources

24 months:

Importance of EPSDT visits and follow-up visits if needed
Injury prevention , e.g., streets, falls, matches, guns, knives, hot liquids out of reach, car seat use, safety gates, safety plugs
Toilet training readiness
Sleep issues, e.g., night fears, nightmares
Developmental issues, autonomy, dependency and conflict
Normal body curiosity
Mild speech dysfluency
Childcare providers
Age appropriate stimulation; reading, telling stories, pretend activity, television supervision and limits, singing, parallel play, self-expression
Nutrition, e.g., family meals, snacks
Dental care - dental visit every 6 months
If mother is pregnant, talk about the impact of pregnancy on a two-year-old
Emphasize family strengths, explore range of parental supports
Good parenting practices, read, sing, talk to child
Parental/caregiver use of tobacco, alcohol, and drugs; risks to child
Available resources, e.g., WIC, Early Intervention, transportation, emergency resources

3 years:

Importance of EPSDT visits and any follow-up
Injury prevention, age appropriate car seat, water supervision, sunscreen, hot liquids, matches, never leave child alone
Toilet training, lapses in control especially at night
Developmental issues, e.g., sexual curiosity, onset of fears, rivalry
Interest in language; encourage discussion of activities with child
Discipline
Nursery school/day care
Age appropriate stimulation, e.g., dressing self, painting, art work, riding a tricycle, handling anger
Nutrition, e.g., 3 meals/day, avoid small hard food
Dental care, dental visit every 6 months
Emphasize family strengths, explore range of parental supports
Good parenting practices, teach about "stranger danger"
Parental/caregiver use of tobacco, alcohol and drugs; risks to child
Available resources, e.g., WIC, transportation, emergency resources, preschool programs; referral of children with special health care needs to the school district

4 - 5 year olds:

Importance of EPSDT visits and immunizations
Safety, e.g., guns, playground, neighborhood and water safety, strangers
Toilet training and night accidents
Age appropriate sex education
Discipline, limit setting, rules
Developmental issues, e.g., socialization, right from wrong, feelings
Stimulation: nursery school, increased excursions (zoos, museums, fire and police stations,

amusement parks), spending time with child, promote physical activity
Building self confidence - teach personal care and hygiene
Assign age appropriate chores
Nutrition, e.g., nutritious foods and snacks
Dental care and dental emergencies, dental visit every 6 months
Limit and supervise television watching
Emphasize family strengths, explore range of parental supports
Available resources, e.g., WIC, transportation, preschool, referral of children with special needs to the school-district

SCHOOL AGED CHILDREN

Safety: bicycles; seat belts, matches, fires, poison, water safety, skate boards, playing in the street, awareness of strangers, how to find help, sunscreen, staying smoke/drug free, guns, peer pressure, sport safety, supervision after school.

Developmental needs:

Talking out problems with family members, expressing thoughts and feelings
Child needs secure home environment to develop a sense of belonging
Needs parent reinforcement to develop self-confidence
Needs freedom to explore new skill areas: not compared to other sibling or children

Children depend on approval of others to develop personal assessment of how they fit into their world: need to be reassured there are many ways to do things, appropriate affective verbal messages, recognition for skills, opportunities for problem-solving

Develop sense of right and wrong, set consistent limits that are reasonable, provide healthy role models, punishment/discipline that fits the wrong-doing (reassuring of parental love following correction), anger/conflict and resolution, authority respect

Fostering interest in school - peer interaction, peer pressure, foster reading, team play, group activities

6 years:

Importance of EPSDT visits
Good health habits and self care
Developmental issues
Social interaction, encourage parents to know child's friends
Dental care and sealants, dental visit every 6 months
Good parenting practices: discipline, promote responsibility, discuss peer pressure and appropriate decision-making skills, self-respect and respect for authority

8 years:

Importance of EPSDT visits
Good health habits, self care and personal hygiene
Dental care, e.g., brushing, sealant and daily flossing, dental visit every 6 months
Family/social interactions: community programs, scouts, sports, praise success
Promote school/teacher interaction
Know child's friends, teach child not to smoke, use drugs or alcohol
Good parenting practices: discipline, promote responsibility, discuss peer pressure and appropriate decision-making skills, self respect and respect for authority

10 years:

Importance of EPSDT visits
Good health habits and self care
Danger of drugs, smoking, alcohol, and guns
Protection from abuse
Sex education: preparation for menstruation, wet dreams, and abstinence
Encourage parents to know friends and social activities
Educational activities: homework and school, teach about culture
Good parenting practices: discipline, promote responsibility, discuss peer pressure and appropriate decision-making skills, conflict management skills

12 years:

Importance of EPSDT visits
Good health and self care including oral care
Sex education, discuss abstinence, body changes
Protection from abuse
Encourage social interaction, religious and spiritual needs
Importance of academic activities
Importance of parental communications
Making wise and healthy choices, e.g., peer pressure, drugs, alcohol, steroids, diet pills, sexual activity
Good parenting practices: discipline, promote responsibility, decision-making skills, conflict management skills

ADOLESCENT*Nutrition:*

needed for growth, hormonal changes, stress, pregnancy, diet practices and disorders

Safety:

aggressive behavior, safe driving, seatbelts and helmets, drinking and driving, firearms, crime/victim prevention

Behavior:

alcohol and substance abuse, avoidance of smoking or tobacco use, risk taking, self esteem and respect, sexual behavior, TV watching, social actions, sports, study habits, making wise choices, positive self-image

Development:

establish identity, body image, ability to think abstractly, increased peer interaction/wise choices,

increased emancipation from family—challenges to parental authority, onset of idealistic/altruistic thoughts, career goals, relationships and sexuality

Advise/Counseling:

major events of puberty (including need for testicular self exam and information on menstruation), success in school, school activities, family relationships, peer relationships, outside interests, attitudes and religious beliefs, contraception/abstinence, conflict resolution, unhealthy habits, community service and employment; medical, dental and behavioral health resources

14 years:

Safety issues, e.g., seat belts/helmets, mouth guards, body piercing, weapons

Good health habits and self care, e.g., substance abuse, eating habits, sleeping habits, exercise, injury prevention

Sexual activity, e.g., STD/HIV transmission, abstinence, sexual orientation, contraception

Protection from abuse: physical, emotional, sexual; date rape

Social interaction, e.g., community services, team sports

Importance of educational activities

Making healthy choices, peer pressure, positive goal setting - plans for the future

16 years:

Good health habits and self care

Sexual activity

Peer pressure

Social interaction

Importance of educational activities

Good parenting practices

Discuss plans for the future

18 years:

Good health habits and self care

Sexual activity

Peer pressure

Social interaction

Importance of educational activities

How to access health care

Plans for future

20 years:

Good health habits and self care

Sexual activity

Peer pressure

Social interaction

Educational activities

Plans for future

Appendix 2: Developmental Milestones

Note: The below developmental milestones are recommended as minimal to be assessed, through surveillance, observation, and inquiry/discussions with parent(s), guardian(s), caretaker. The developmental milestones were developed in conjunction with AAP's *Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents*. Green M.(Ed.). 1994. Arlington, VA: National Center for Education in Maternal and Child Health.

2 - 4 weeks:

- Raises head momentarily when prone
- Fixes on human face and follows with eyes
- Responds to parent's face and voice, smiles spontaneously
- Responds to sound by blinking, crying, quieting, changing respiration or showing startle response
- Has flexed posture; moves all extremities
- Can sleep for three or four hours at a time; can stay awake for one hour
- Can be consoled most of the time by being spoken to or held

2 months:

- Grasps rattle placed in hand
- Social smiles, smiles responsively
- Coos and reciprocal vocalization
- Shows interest in visual and auditory stimuli
- Demonstrates social interaction, follows moving person with eyes
- When prone, lifts head, neck and upper chest with support of forearms
- Some head control in upright position

4 months:

- Holds head high, raises body on hands when prone, sits when supported
- Controls head well
- Rolls prone to supine
- Plays with hands, holds rattle, reaches for objects, holds own hands
- Looks at mobile, arms active
- Follows object 180 degrees
- Smiles, coos, laughs, babbles; initiates social contact, turns to voice
- May sleep at least six hours
- Able to comfort self, e.g., fall asleep by self

6 months:

- Rolls from front to back; sits with support
- Bears weight, stands with support
- Transfers objects hand to hand
- Turns to sound and voice; may show stranger anxiety
- Raking hand pattern; grasps and mouths objects
- Vocalizes single consonants ("dada", "baba"); may imitate sounds of speech
- Babbles reciprocally; Reacts socially by smiling in response to someone else's smile
- Shows recognition of parents; shows interest in toys
- Starts to self-feed
- First tooth may erupt

9 months:

- Sits independently
- Reaches for objects with one hand
- Crawls, creeps or scoots on bottom
- Pulls to stand, stands holding on
- Inferior pincher grasp, pokes with index finger
- Bangs, throws and drops objects
- Finger feeds, starts to use cup
- Imitates vocalizations; babbles
- May say “dada” and “mama” nonspecifically
- Responds to own name
- Understands a few words, e.g., “no-no”, “bye-bye” - combines syllables
- Can sleep through the night
- May show stranger anxiety
- Enjoys interactive games, e.g., peek-a-boo and pat-a-cake
- Turns towards sound with eyes and head movement

12 months:

- Pulls to stand, stands alone, cruises, may take a few steps alone
- Has precise pincer grasp
- Points, indicates wants
- Has vocabulary of one to three words; uses “mama” and “dada” correctly
- Recognizes caregiver’s voice
- Obeys simple requests; waves “bye-bye”
- Feeds self, drinks from a cup
- Actively look for hidden or dropped objects
- Shows emotions (fear, anxiety, affection)
- Imitates

15 months:

- Walks alone, bends over, may run
- Crawls up stairs
- Stacks two blocks
- Can point to one or more body parts
- Feeds self with fingers, drinks from cup
- Understands simple commands
- Listens to a story
- Has vocabulary of three to six words
- Indicates wants by pointing or grunting
- Imitates activity
- Can remove some clothing

18 months:

- Likes to climb and run, walks backwards; climbs into chair, sits in chair
- Throws/kicks ball; stacks three or four blocks
- Has a vocabulary of 15-20 words, uses two word phrases, imitates words
- Uses a spoon and cup, can remove clothing
- Listens to a story, looking at pictures and naming objects
- Plays with toys appropriately, e.g., pulls a pull toy, cuddles a doll
- Answers simple questions by pointing, follows simple directions
- Scribbles spontaneously, imitates crayon strokes
- Dumps object from bottle without demonstration
- Shows affection, hug and kisses

24 months:

- Up and down steps holding on with one hand
- Jumps, runs, throws overhand
- Stands on one foot with little support
- Can stack five or six blocks
- Vocabulary 50+ words, 2 word phrases, understands pronouns
- Speech should be intelligible to parents
- Parallel play dominant
- Possessive with toys
- Can follow two step commands, can name some body parts
- Makes or imitates horizontal and circular strokes with crayon
- Imitates adults
- Increasing attention span
- Separation anxiety from parents
- Brushes teeth with help, puts on clothing, washes hands

3 years:

- Jumps in place, kicks a ball, balances on one foot, stacks blocks
- Rides a tricycle
- Alternates feet ascending stairs
- Knows name, age and gender
- Copies circle and cross, visually discriminates colors
- Has some self care skills, e.g., feeding and dressing self
- Demonstrates speech that is mostly intelligible
- Pretend play well developed
- Can follow directions
- Names colors

4 years:

- Hops, jumps forward, alternates feet when climbing stairs, balances on each foot, climbs
- Rides tricycle
- Builds tower of 10 or more cubes, plays board/card games
- Throws overhand
- Ability to cut and paste
- Draws a person with 2 or 3 parts; copies circle, cross and square
- Can sing a song
- Can talk about daily activities
- Can distinguish fantasy from reality
- Make believe play, imaginary playmates
- Puts away own toys
- Dresses and undresses self, brushes teeth with no help

5 years:

- Dresses self without help, ties shoelaces
- Balances on each foot, heel-to-toe walk, can count on fingers
- Knows own address and phone number
- Recognizes colors and common shapes
- Copies simple shapes (e.g., triangle or square), able to print a few letters and numbers
- Draws a person with head, body, arm and legs
- Speaks in phrases that are understood by others
- Plays make believe and dress up, Plays and shares with others
- Understands opposites
- Recalls parts of stories

Kindergarten Checklist

There is no simple method for determining that a child is ready for kindergarten. But this list from a child-development specialist may help parents evaluate their children's developmental level. These developmental skills are important for a child if he is to function happily in the kindergarten classroom.

Speech and language:

- Asks meaning of words
- Describes pictures and experiences
- Uses appropriate verb tense and grammar
- Recognizes simple jokes, riddles, absurdities (Do cats fly?)

Gross motor coordination:

- Walks downstairs, using alternative feet
- Hops on one foot
- Jumps along a 6-foot line with both feet
- Walks scissor steps across a line
- Begins to skip alternating feet

Fine motor coordination:

- Can use scissors to cut a straight line
- Copies a circle, square and cross
- Draws a person fully with body and four limbs
- Traces within lines

Social and emotional:

- Can handle snaps, buckles, buttons, zippers and begins to tie shoes
- Independent toileting
- Dresses and undresses independently
- Able to function in structured group with rules
- Shows concern and sympathy for others
- Initiates sharing and taking turns

Appendix 3: Mental Health Screening Instrument

GENERAL INFORMATION

Illinois children enrolled in the Department's Medical Programs are eligible for comprehensive mental health services, if medically indicated. The Department and the IDHS, Office of Mental Health, have collaborated to develop a system to ensure that children in need of mental health services will be appropriately referred and assessed for mental health treatment.

This Appendix 3 will assist the provider in completing the *Healthy Kids Mental Health Screen* form, the mental health portion of the Healthy Kids periodic screening. The *Mental Health Screen* is for use with children ages 3 through 20. There are recommended questions which will enable the provider to complete the *Healthy Kids Mental Health Screen*. Each of the questions is general in nature and is offered as an illustrative example of the information sought. It is suggested that the interviewer modify the question as indicated by the age of the child and understanding of the informant.

The questions should assist the evaluator in:

- determining whether cognitive functioning/mental status is age-appropriate;
- whether behavior is appropriate (such as goal-directed with response to controls); and
- whether affect is appropriate.

Previous mental health treatment should be recorded on the *Healthy Kids Mental Health Screen* form. The back of the *Healthy Kids Mental Health Screen* form contains a section relating to the child's medical history which may impact mental health or emotional development.

Questions regarding maltreatment or possible maltreatment of the child should be addressed. For children over the age of three it is recommended that the maltreatment questions be asked of the child and their parents or caregiver separately.

It is important to note that the guidelines regarding maltreatment DO NOT suggest that in the event the provider/evaluator learns of, or suspects current maltreatment, that the provider is removed from professional responsibility for reporting abuse or neglect in lieu of making a referral to the Mental Health provider. **All suspected abuse or neglect shall be immediately reported to:**

1-800-25ABUSE.

When completing a referral to the Mental Health provider, please keep in mind that the provider's task is to identify behaviors and concerns that will assist the mental health professional understand the nature of the child's problem. Whenever the parent/caregiver, child or provider perceive a problem to be in existence and **outside a "normal range" in extent or intensity**, mark all behaviors/symptoms that apply.

Signs or symptoms may vary in severity frequency, onset and duration; all of which are important issues in determining whether to refer or not.

The *Healthy Kids Mental Health Screen* (DPA 3411B) can be ordered by providers in Cook, DuPage, Kane, Kankakee, Lake, Will and Winnebago counties by completing form DPA 1517A and mail copy to:

Illinois Department of Public Aid
5055 West Lexington
Chicago, Illinois 60644-5288

Providers located in all other counties and out-of-state are to complete DPA 1517 and mail copy to:

Illinois Department of Public Aid
5000 Industrial Drive
Springfield, Illinois 60703-5387

Additional information about ordering Department forms can be found in *Chapter 100 - General Policy and Procedures, 112.43 Ordering of Claims Forms and Envelopes*.

Decision-Making Regarding Mental Health Referrals

Sorting Out the Levels of Risk

In making a decision regarding referral, many of the symptoms/behaviors are significant enough to trigger an immediate referral. You will find these printed in bold on the checklist form. They include:

- Suicidal Behavior or Suicidal Ideation
- Signs of Self Destructive Behavior
- Evidence of Abuse or Neglect Affecting Mental/Emotional Health
- Sexually Victimizes Others or Has Been Sexually Abused
- Victimization
- Evidence of Delusions or Hallucinations
- Appears Depressed or Hyperactive
- Demonstrates Signs of Eating or Sleeping Disorders
- Intentionally Hurts other People or Animals
- Engages in Fire setting
- Substance Abuse in Conjunction With Other Mental Health Concerns

The presence of any of these symptoms or behaviors may signal that the child is in crisis and are considered potent clinical indicators for possible referral to the appropriate mental health provider so that a mental health assessment, and if appropriate, mental health treatment may be obtained.

Children with other behaviors identified on the *Healthy Kids Mental Health Screen* which in combination might indicate a mental or emotional disorder should be referred for a mental health assessment.

Referrals under the EPSDT program requires that the provider:

- Obtain written consent of the parent/guardian to release information to the mental health service provider
- Make contact with an approved Mental Health Service Provider and set an appointment
- Communicate with the child and Parent/Guardian, the appointment time and location before they leave your office following the screening
- Send copies of your Mental Health Screen to the referral source
- Receive from the referral source within a reasonable amount of time (e.g. ten days following the appointment date) notification as to the disposition (show/no show) of the appointment, including any diagnosis and recommendations

The Mental Health Provider will, with the written permission of the parent/guardian:

- Receive the referral
- Notify physician if the appointment was not kept and has been re-scheduled. If the child has an identified case manager, the case manager should be notified for the purpose of follow-up
- Assess the client
- Provide continuing feedback to the referring physician as indicated (e.g., significant changes in the treatment plans, if hospitalized, referred for residential treatment, medication changes).

HEALTHY KIDS MENTAL HEALTH SCREEN

Recommended Questions to Assess Checklist Indicators (Ages 3 through 20)

In order to accurately complete the Healthy Kids Mental Health Screening form, the following simplified questions covering the specific areas of concern may be found helpful to the screener. Although these questions are written to be asked of the parent/guardian, they can easily be adapted to first person for older children and adolescents. It is helpful to have the parent or child/adolescent provide examples (specific situations). Age appropriateness should be considered for all question asked.

Introductory Questions: Do you have concerns about this child? What concerns you most about this child? (These questions might give you an indication of what areas on the Mental Health Screen should be more closely explored.)

THINKING:

1. **Delusions** - Does your child: have “weird” thoughts or behaviors that concern you or tend to be different from what most other children his age believes; believe that he has some unusual ability or power (not related to his age or developmental period)?
2. **Hallucinations** - Does your child hear, see, taste, touch or smell things that are not really there?
3. **Paranoia** - Is your child inappropriately suspicious of others, or does he feel that others are out to get him?
4. **Obsessive Ideation** - Does your child: seem to think about or talk about the same thing most of the time; seem to be preoccupied with things such as death, sex, bodily functions, extreme cleanliness, or other things that are unusual for someone his age.
5. **Frequent Memory Loss** - Does your child often tend to forget things most other children his age would remember?
6. **Confusion** - Does your child often seem to be confused, have difficulty following or understanding simple directions, or seem easily upset by instructions/directions?
7. **Easily Distracted** - When your child is working on something, is movement or noise bothersome or so distracting that the task is not completed?
8. **Difficulty Concentrating** - Does your child: often begin things and fail to finish them; have difficulty in finishing one thing prior to beginning another; move from activity to activity without apparent purpose?

FEELING:

1. **Depressed Mood (Sad)** - Does your child seem to often be depressed or sad? Has your child lost interest in things he used to enjoy?
2. **Inappropriate Affect** - Does your child seem, without a reason, to often be happier and more energetic than most children his age or, be sad or angry when there seems no reason to be?
3. **Anxiety, Agitation** - Does your child appear to be frightened, nervous or upset easily or often?
4. **Anger** - Is your child often easily angered or seem to often be mad?
5. **Apathy** - Does your child show a lack of interest in things he once enjoyed? Describe onset.
6. **Low Self-Esteem** - Does your child think he is less important, not as pretty or smart as other people?

7. Self-Critical - Does your child say things that “puts himself down”?
8. Cries Excessively - Does your child cry often over little things?
9. Cries too little - Does your child not cry when you think he should?
10. Emotionless, Flat Affect - Does your child fail to show feelings such as sadness, happiness or anger as often than other children his age?
11. Feels Out of Control - Does your child act as though he is losing control of what he says, does or thinks? Does he say he fears losing control or “going crazy”?

BEHAVIOR:

1. **Intentionally Hurts Others** - Does your child seem to intentionally hurt others? How often? In what ways?
2. **Self-Destructive** - Does your child intentionally do things to hurt himself? Does he often engage in dangerous or “risky” behaviors that might lead to injury or trouble?
3. **Intentionally Hurts Animals** - Does your child do things to intentionally hurt animals?
4. **Sexually Victimizes Others** - Has your child forced/made others do sexual things?
5. **Sets Fires** - Does your child play with fire or been known to set fires? Explain.
6. Compulsive Behavior - Does your child do the same thing repeatedly or not seem able to stop an activity or behavior once it is started?
7. Destructive Behavior - Does your child destroy other people’s things on purpose? His own things?
8. Overreacts - Do little things bother your child to the point where he responds more strongly than other children?
9. Overactive - Does your child appear to often have trouble sitting still when compared to other children his age?
10. Listless - Does your child seem to easily lose interest or energy for doing things?
11. Argumentative - Does your child often argue or disagree with others?
12. Refuses to Talk - Does your child refuse to talk (or ignore people) when spoken to?

SOCIAL INTERACTION:

1. Home Problems:
 - a. Does your child have relationship problems with parents/guardians?
 - b. Does your child have more problems with siblings than most children?
 - c. Does your child have problems with others living in your house or other relatives?
2. Community Interaction:
 - a. Has your child stolen on more than one occasion?
 - b. Does your child lie often?

- c. Has your child come into contact with the police because of his behavior? Is he on probation, court supervision or parole?
3. Defies Authority - Does your child have trouble getting along with people in authority (teachers, police, parents, etc.)?
4. Friendless, Isolated - Does your child complain of not having friends, of others "picking on" him or does he play alone most of the time?
5. Immature - Does your child often act like children of a much younger age?
6. Excessive Clinging - Does your child show excessive fear when strangers are around? Refuse to stay with babysitters? Cling to you often?
7. Withdrawn/Unresponsive - Does your child: prefer to play with things rather than people; ignore others even when spoken to? Have there been any recent changes in the way your child interacts with others including less involvement with others? Has your child's ability or willingness to communicate/talk with others changed recently?
8. Inattentive - Does your child seem to ignore things taking place around him?
9. School Problems:
 - a. Does your child have many fights at school?
 - b. Is (has) your child failing in school? Are your child's grades much lower than he is capable of?
 - c. Has your child been expelled/suspended from school for behavior?
 - d. Is your child absent from school often? Does your child refuse to attend school? Does your child skip school (truancy)?
 - e. Is your child in a special education class for behavioral or emotional **problems**?
 - f. Does the child's age minus his grade equal 5 or 6? If not, does it indicate the child is below his normal grade level in school? Is so, why?

<u>Age</u>	<u>Minus</u>	<u>Grade</u>	
10	-	4	= 6 (age appropriate)
10	-	2	= 8 (not age appropriate)

PHYSICAL PROBLEMS: Before checking any of these, the physician should rule out any physical disorders which could account for the problem.

1. Eating Disorders - Does your child do any of the following: a) Refuse to eat often? b) Often overeat? c) Vomit often following a meal? d) Have diarrhea often? e) Complain often of stomach aches?
2. Sleeping Disorders - Does your child do any of the following?
 - a) Have difficulty falling asleep?
 - b) Have difficulty staying asleep?
 - c) Feel tired most every day?
 - d) Sleep walk?
 - e) Have bad dreams or nightmares frequently?
 - f) Cannot be awakened from a bad dream?
 - g) Snore a lot?
 - h) Move violently, jerk, twitch or grind teeth during the night?
3. Enuresis - Does your child wet the bed at night or his clothing during the day?
4. Encopresis - Does your child soil his pants in bed or during the day?

5. Frequent Somatic Complaints - Does your child often complain of body pains or of being sick?
6. Drastic Weight Change - Has your child gained or lost a lot of weight lately? (more than 10% of his body weight?)
7. Lethargic - Does your child appear to be often tired or have little energy?

The screener should provide comments for any item checked in this section in the Comment section on the back side of the form.

The following information may be obtained by interview or observation:

LIFE CHANGES: (Stressors) (last year)

Victimized/Neglect - physical, sexual, financial (robbery, etc.), emotional, abuse or neglect (provide comments)

- Death of Family Member or close friend - indicate relationship
- New School - change of school (indicate number of changes in past three years)
- Loss of Relationship - indicate relationship and cause
- Serious Illness/Injury - of self or family member (indicate nature of illness or injury)
- Incarceration of Parent - Parent or guardian placed in jail or prison
- Loss of Job - self or family member (indicate impact on family)
- Economic Loss - fire, accident, repossession, etc.
- Residence - include foster placement, moves (indicate number)
- Witnessed a Violent Crime - personally viewed the commission of a crime of violence or the injuries/death of the victim shortly thereafter

SUICIDE IDEATION:

1. Ideation/Plan - Is your child talking to you about ending his life, about life being, hopeless, of wanting to do serious self-harm? Does he talk about death often? Has your child ever spoken of a plan to kill himself? If so; how, when, and where has he indicated he will do it?
2. Gestures - Have there been suicidal gestures (threats, notes, scratches on wrists, etc.) within the past year. Has your child done anything else that makes you think he seriously wants to end his life?
3. Attempts - Have there been attempts (overdoses, hanging, etc.) that were unsuccessful anytime during his life? Has your child ever intentionally harmed himself?

The screener should comment on any suicidal indications in the Comment section on the back of the form.

SUBSTANCE ABUSE:

What drugs and alcohol usage has occurred, if any? Indicates types, amounts and frequency.

MEDICAL ISSUES:

Is there a significant illness or injury in the child's medical history which might contribute to a mental/emotional disorder? (Indicate medical diagnoses, current medications, hospitalizations, major illnesses, surgeries, severe injuries, significant developmental delays, out-of-home placements, significant family crises.)

ABUSE/NEGLECT:

Is there anything that cause you to suspect child abuse or neglect? (SPECIFY)

Report immediately (1-800-25-ABUSE)

Appendix 3**Healthy Kids Mental Health Screen****Ages 3 Through 20****Illinois Department of Public Aid Maternal and Child Health**CHILD

NAME _____
 BIRTH DATE _____ AGE _____
 GRADE _____ MEDICAID NO. _____

PARENT/CAREGIVER

NAME _____
 ADDRESS _____
 PHONE _____

SCREENER

NAME _____
 PHYSICIAN/CLINIC _____
 ADDRESS/PHONE _____

INSTRUCTIONS: Question the child, parent/guardian, and check medical records. Based on age appropriateness, mark those which are currently indicated unless otherwise instructed. Make a referral for a Mental Health Assessment when necessary. (Refer to Provider Handbook for instructions.) **STOP! If the child has already been referred or is currently receiving treatment do not continue.**

Do you have any concerns about this child? What about this child concerns you most?

THINKING

- ☐ **Delusions**
☐ **Hallucinations**
☐ **Paranoia**
☐ Obsessive Ideation
☐ Frequent Memory Loss
☐ Confusion
☐ Easily Distracted
☐ Difficulty Concentrating
☐ None of the Above

SOCIAL

- ☐ Problems at home
☐ Parents
☐ Siblings
☐ Others
☐ Community Interaction
☐ Stealing
☐ Chronic Lying
☐ Police Involved
☐ Defies Authority
☐ Friendless, Isolated
☐ Immature
☐ Excessive Clinging
☐ Withdrawn/Unresponsive
☐ Inattentive
☐ School Problems
☐ Excessive Fighting
☐ Failure, Grades
☐ Expulsion
☐ Truancy
☐ Special Ed. (Behavior/Emotional Problems)
☐ Child's Age (minus) Grade = 5 or 6
☐ None of the above

FEELING

- ☐ **Depressed Mood** (Sad)
☐ Inappropriate Affect
☐ Anxiety, Agitation
☐ Anger
☐ Apathy
☐ Low Self-Esteem
☐ Self-Critical
☐ Cries Excessively
☐ Cries Too Little
☐ Emotionless, Flat Affect
☐ Feels Out of Control
☐ None of the Above

PHYSICAL (Rule out physical disorder)

- ☐ **Eating Disorder**
 (specify)
☐ **Sleep Disorder**
 (specify)
☐ Enuresis
☐ Encopresis
☐ Frequent Somatic Complaints
☐ Drastic Weight Change
☐ Lethargic
☐ None of the Above

SUICIDE ASSESSMENT (___ N/A)

- ☐ **Ideation/ Plan** (current)
☐ **Gestures** (past year)
☐ **Attempts** (during lifetime)

Comment on back for any item checked under Physical or Suicide.

BEHAVIOR

- ☐ **Intentionally Hurts Others**
☐ **Self-Destructive**
☐ **Intentionally Hurts Animals**
☐ **Sexually Victimizes others**
☐ **Sets Fires**
☐ Compulsive Behaviors
☐ Destructive Behaviors
☐ Overreacts
☐ Overactive
☐ Listless
☐ Argumentative
☐ Refuses to Talk
☐ None of the Above

LIFE CHANGES (past year)

- ☐ **Victimized/Neglect**
☐ Death of Family Member
☐ New School
☐ Lost Relationship
☐ Serious Illness/Injury
☐ Incarceration of a Parent
☐ Loss of Job
☐ Economic Loss
☐ Residence
☐ Witnessed a Violent Crime
☐ None of the Above

SUBSTANCE ABUSE (___ N/A)

Drug of Choice:

Amount:

Frequency:

MEDICAL ISSUES: Mark any of the following that are applicable. Has the child ever or do they currently have any of the following: (Provide narrative under comments)

CHRONIC CONDITIONS

- ☐ Diabetes
☐ Heart Condition
☐ Asthma
☐ Tuberculosis
☐ Urinary Tract Condition
☐ Anemia
☐ Cancer
☐ G.I. Condition
☐ Other (specify)

HEALTH HISTORY

- ☐ Major Surgery (specify)
☐ Head Injury (medically evaluated)
☐ Other Injury
☐ Medical Hospitalization (past 3 years)

FAMILY SITUATION

- ☐ Out of Home Placement
☐ Family History of Mental Illness
☐ Family History of Substance Abuse
☐ Child or Family Received Counseling (past 3 years)

PSYCHIATRIC HOSPITALIZATION during the past three years ___child ___family member.

List other **MEDICAL CONDITIONS** that may impact mental or emotional development:

Is the child currently on **MEDICATION**? If so, specify medication and dosages:

COMMENTS: (comment on all items checked under "Physical" or "Suicide")

Note: Bolded items may require an immediate referral.

___CHECK IF PARENT OR GUARDIAN REQUESTS A REFERRAL.

Suspected Child **ABUSE** and **NEGLECT** must be reported to DCFS immediately!

1-800-25ABUSE.

The PHYSICIAN conducting the Healthy Kids Mental Health Screen:

1. Makes an appointment with a Mental Health provider when indicated. The appointment should be made while the child is at your office and the information about the appointment should be given to the parent/caregiver.
2. Sends a copy of this form to the Mental Health provider.

REFERRAL TO _____ DATE _____ TIME _____

DATE CLIENT NOTIFIED OF APPOINTMENT _____ BY WHOM _____

The MENTAL HEALTH PROVIDER conducting the mental health assessment, with the signed consent of the parent/guardian:

1. Sends a copy of this form to the referring physician once the assessment has been completed indicating recommended services.
2. Informs the referring physician of the missed or rescheduled appointments.
3. Reports the clients progress, change in treatment plans on a quarterly basis until case closure.

To be completed by the **MENTAL HEALTH PROVIDER ONLY** and returned to the referring physician.

DATE OF ASSESSMENT _____ DIAGNOSIS _____

Appendix 4

HEALTHY KIDS Substance Abuse Screen Instructions

The screen can be administered by virtually anyone who knows the patient, like the parent or another significant person in the patient's life; or a person who has a professional relationship with the patient, such as a nurse or other physician's office personnel. The screen is **NOT a diagnostic tool. Rather it provides a way to capture some vital information that can be used to either confirm, or dispel, the possibility of a substance abuse problem with the young person under consideration.**

With the exception of the items in **bold print**, no single response has much meaning in, and of, itself. It is a series of responses that present a pattern, no matter how slight, of attitudes and behaviors which lead the screener to feel that more information is needed. The screening process will not confirm the existence of a substance abuse problem, but it will give sufficient support for a recommendation that the client see a substance abuse professional for a formal, clinical evaluation.

It is important for the screener to remember that the earlier a problem is identified, the earlier a serious intervention can begin. Substance abuse that is caught early, is very treatable. Like most diseases, however, if left untreated, the costs, both personal and financial, grow considerably.

Guidelines to Each Section

Thinking: How the patient processes information is the focus of this section. Everyone will get confused at times and at times, forget things. That is normal. What is being assessed is a pattern of thought processes that are significantly different from other young people. In other words, does the patient usually process information normally, or is he/she usually confused, distracted, and disoriented?

Life Style Changes: No single item means a problem in isolation. If a pattern of responses is noted however, the screener should begin to consider the possibility of dysfunctional living. Combinations of these elements present a set of characteristics that are common to many youthful substance abusers.

Temperament: There is no need to be concerned with the occasional or sporadic flash of temper. All young people get frustrated from time to time and that frustration often takes the form of anger or a negative attitude. In this section, the screener is trying to find out if the young person shows these negative behaviors or attitudes represent a change from the way the patient used to be. Many times this will be noted when a parent says something like "I just don't know what's the matter with him/her anymore. He/She used to be such a nice boy/girl."

Social: This is the area that the patient and the family often have the hardest time talking about. The environment in which the patient lives is influenced by many things. If those environmental factors reflect negatively on the parents, they do not surface easily. For example, if the parents are problem drinkers, or if they do drugs themselves, it will be difficult for them to admit that their behavior has a negative impact on the rest of the family. Also, as young people mature, their peer relationships change. This is normal. However, if the young patient now rejects, or is rejected by the friends he/she once had and if the new friends tend to be secretive or reluctant to share what they do with others, especially with adults, it might indicate that the patient's new constellation of friends belong to the marginal sub-culture associated with drug use. With young people, the old adage that, "you are known by the friends you keep," is very accurate. Again, in this section, the screener is looking for abrupt change and for patterns of signs and symptoms. Any one of the items by itself has little, if any, significance.

Behavior: This section deals with elements that are the most obvious, and the behaviors noted here are the ones most commonly associated with a young person who is attempting to deal with a problem of some type. Those attempts may, or may not, involve drug use. Or, drug use itself may be the problem. Finding out which came first is not important at this point. The important thing is to note that all of these behaviors tend to be negative and a pattern of even a couple of them is an excellent indicator that some kind of professional involvement is called for. If drug use can be ruled out early, other appropriate help can be provided. If the professional finds substance abuse at this early stage, however, a lot of critical time has been saved and the appropriate treatment can begin sooner, rather than later.

Substance Abuse: Any checked item in this section is an automatic “trigger” to make a referral for a formal, clinical assessment by a substance abuse professional. No exceptions, no excuses, no denial. If the screener notes even one of these examples, the case should be referred for professional interventions. In conclusion, the screener can either write up a brief summary for the physician, or the completed screen can simply be given, without comment, to the doctor for his evaluation. In any event, the physician will determine the next step in the patient’s care. If a referral is made, the Primary Care Provider, or case manager, if the patient has been assigned one, should see to it that the patient keeps the appointment for a clinical assessment by the substance abuse professional.

SUBSTANCE ABUSE PRE-ASSESSMENT SCREEN

Use and Referral Process

INSTRUCTIONS

To make a referral for clinical assessment of a suspected problem with alcohol or other drug abuse, please administer the attached pre-assessment screen to the patient. The screen is in a simple check list format and it can be administered by virtually anyone.

When the screen has been completed, review the results. If, in the provider’s professional opinion, there is reason to SUSPECT the presence of a substance abuse problem, refer that patient to a substance abuse professional for a clinical assessment. Once completed, that assessment will be returned to the provider for inclusion in the provider’s comprehensive evaluation of the patient and patient’s confidential medical record.

DECISION-MAKING REGARDING SUBSTANCE ABUSE REFERRALS

Sorting Out the Levels of Risk

Referrals under the EPSDT program requires that the physician/provider:

- Obtain written consent of the patient to release information to the substance abuse treatment provider.
- Make contact with an approved substance abuse treatment services provider to arrange an appointment.
- Communicate with the patient and parent, the appointment time and location before they leave the provider’s office following the screening.
- Send copies of your Substance Abuse Treatment Screen to the referral source.
- Receive from the referral source within a reasonable amount of time (e.g. ten days following the appointment date) notification as to the disposition (show/no show) of the appointment, including any diagnosis and recommendations.

The substance abuse treatment provider will, with the written permission of the parent:

- Receive the referral.
- Notify the physician if the appointment was not kept and has been re-scheduled. If the patient has an identified case manager, the case manager should be notified for the purpose of follow-up.
- Assess the patient.
- Provide continuing feedback to the referring physician as indicated (e.g. significant changes in the treatment plans).

CONTACT POINTS FOR SUBSTANCE ABUSE TREATMENT SERVICES

To arrange for a pre-assessment screening to identify the presence of a substance abuse problem, or to schedule a formal, clinical assessment of your patient by a certified substance abuse professional, please contact an appropriate agency or program.

The Substance Abuse Screening Instrument (DPA 3411D) can be ordered by providers in Cook, DuPage, Kane, Kankakee, Lake, Will and Winnebago counties by completing form DPA1517A and mailing the copy to:

Illinois Department of Public Aid
5055 West Lexington
Chicago, Illinois 60644-5288

Providers located in all other counties and out-of-state are to complete DPA 1517 and mail the copy to:

Illinois Department of Public Aid
5000 Industrial Drive
Springfield, Illinois 62703-5387

Additional information about ordering Department forms can be found in *Chapter 100 - General Policy and Procedures, 112.43 Ordering of Claims Forms and Envelopes*.

HEALTHY KIDS PROGRAM
Cross-Walk:
Previous State-Generated Healthy Kids Codes and Equivalent CPT Codes

NOTE: State-Generated “W” codes used to bill Healthy Kids screening services are terminated with dates of service 1/1/02 and after. For Healthy Kids screening services provided on 1/1/02 and after, use the appropriate CPT code listed on this Crosswalk to bill Healthy Kids screening

Procedure Description	State-Generated Code	Recommended CPT Code Use with dates of service 1/1/02 and after
WELL CHILD VISIT		
EPSDT - Well Child Visit	W7018	99381-99385 99391-99395 (use appropriate CPT code for the medical service provided)
Make Up Visit	W7588	99211
DEVELOPMENTAL ASSESSMENT		
McCarthy Screening Test	W7114	96111
Early Screening Inventory	W7115	96110
Developmental Profile II	W7116	96110
Minneapolis Preschool Screening Instrument	W7117	96110
Vineland Social Maturity Scale	W7118	96111
Denver DST/Denver II	W7430	96110
Project Memphis DST	W7273	96110
Battelle Developmental Inventory	W7695	96111
Bayley Scales of Infant Development	W7696	96111
Piers-Harris Children's Self-Concept Scale	W7697	96111
Otis-Lenon School Ability Test	W7698	96111
Early Screening Profiles	W7364	96110
Revised Developmental Screening Inventory	W7368	96110
Revised Parent Developmental Questionnaire	W7369	96110
Dial-R Developmental Assessment	W7382	96110
Chicago Early Developmental Screening Inventory	W7367	96110

Procedure Description	State-Generated Code	Recommended CPT Code Use with dates of service 1/1/02 and after
Vineland Adaptive Behavior Domain	W7376	96111
Ages and Stages Questionnaires (ASQ)	-----	96110
Battelle Developmental Screener	-----	96110
Bayley Infant Neurodevelopment Screener	-----	96110

		90646 (PRP-D)		2 Months to 71 Months
		90647 (PRP-OMP)		2 Months to 71 Months
		90648 (PRP-T)		2 Months to 71 Months

Vaccination	State-Generated Code	CPT Code	
Hepatitis B	W7589	90744	Birth And Older
		90746	Birth And Older
		90747	Birth And Older
Comvax (Hib and Hep B)	W7592	90748	6 Weeks to 71 Months
Prevnar		90669	6 Weeks to 10 Years
Pneumococcal (Polyvalent)		90732	* 2 Years and Older
Hepatitis A, adult dose		90632	18 Years and Older
Hepatitis A, pediatric/adolescent dosage - 2 dose schedule		90633	2 Years through 17 Years
Hepatitis A, pediatric/adolescent dosage - 3 dose schedule		90634	2 Years through 18 Years

* Recommended in (1) immunocompetent persons age 2 years or greater who have various serious chronic diseases such as Chronic Pulmonary Disease, Congestive Heart Failure, Cardiomyopathy, Diabetes Mellitus, Chronic Liver Disease, Functional or Anatomic Asplenia and (2) immunocompromised persons age 2 years or greater including those with HIV infection, Leukemia, Lymphoma, Hodgkin's Disease, Multiple Myeloma, Generalized Malignancy, Chronic Renal Failure or Nephrotic Syndrome, and those who are receiving immunosuppressive chemotherapy (including corticosteroids) and those who have received an organ or bone marrow transplant.

* Prevnar is not recommended in children with the above conditions.

Appendix 9

Periodicity Schedule

The following is intended to be a *guide* to Healthy Kids Screening suggested periodicity schedule. Consult the appropriate chapter of the Handbook for Providers of Healthy Kids Services for specific guidelines. The AAP and AAFP periodicity schedule guidelines may vary slightly. Providers are encouraged to use the periodicity schedule that best meets the needs of the child. This table does not reflect all of the screenings that DCFS requires for children in their legal custody.*

Age	Health Screening ¹	Vision	Hearing	Dental ²	Labs ³	Developmental ⁶	Risk Assessment ⁷	Anticipatory Guidance
Birth	X	S	O		sickle cell ⁴	S		X
2 weeks	X	S	S			S		X
1 Month	X	S	S			S		X
2 Months	X	S	S			S		X
4 Months	X	S	S			S		X
6 Months	X	S	S			S		X
9 Months	X	S	S		H&H ----- lead	S		X
12 Months	X	S	S			S		X
15 Months	X	S	S		H&H	S		X
18 Months	X	S	S			S		X
2 Years	X	S	S	X	lead ⁵ H&H	S		X
3 Years	X	O	S	X	H&H	S	S	X
4 Years	X	O	O	X	H&H	S	S	X
5 Years	X	O	O	X	H&H	S	S	X
6 Years	X	O	O	X		S	S	X

Age	Health Screening ¹	Vision	Hearing	Dental ²	Labs ³	Developmental ⁶	Risk Assessment ⁷	Anticipatory Guidance
7 Years				X				
8 Years	X	O	O	X		S	S	X

13 Years				X	&			
14 Years	X			X	&	S	S	X
15 Years		O	O	X	&			
16 Years	X			X	&	S	S	X
17 Years				X	&			
18 Years	X	O	O	X	&	S	S	X
19 Years				X	&			
20 Years	X			X	&	S	S	X

* DCFS requires children in their legal custody to receive all of the screenings indicated in this table. In addition, they require annual health and dental exams beginning at age 2 years (Hearing and Vision screenings annually begin at age 3 years) until the child reaches age 21 or is no longer in DCFS custody.

Key:

x = recommended at this age

o = objective

s = subjective

& = H&H recommended for menstruating females

H&H= hemoglobin and hematocrit

1. Health Screening: ages 6-20 years, recommended every other year or more often if medically recommended

2. Dental Screening: in addition to annual dental exam, routine prophylaxis and topical fluoride treatment is recommended every six months

3. Lab tests, including but not limited to: urinalysis, cholesterol and TB are to be performed as medically necessary based on the child's history, health status, and current care standards

4. Sickle Cell Screening: testing is recommended for children born before 1989; retest all children with abnormal results

5. Lead Screening: complete a lead screening between 24 months and 72 months if no previous screening is recorded or if results greater than 10mcg/dl

6. Developmental Surveillance: subjective at all well-child visits; objective developmental testing limited encouraged for children under age six and developmental testing extended as needed

7. Risk Assessment: subjective at all well-child visits; objective as needed

Appendix 10

Recommended Childhood Immunization Schedule United States, 2002

Age Vaccine	Range of recommended ages								Catch-up vaccination		Preadolescent assessment

Pneumococcal ⁷			PCV	PCV	PCV		PCV			PCV	PPV	
Hepatitis A ⁸												
Influenza ⁹												

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of December, 2001, for children through age 18 years. Any dose not given at the recommended age should be given at any subsequent visit when indicated and feasible. ■■■■ Indicates age groups that warrant special effort to administer those vaccines not previously given. Additional vaccines may be licensed and recommended during the year. Licensed combination vaccines may be used whenever any components of the combination are indicated and the vaccine's other components are not contraindicated. Providers should consult the manufacturers' package inserts for detailed recommendations.

Approved by the Advisory Committee on Immunization Practices (www.cdc.gov/nip/acip), the American Academy of Pediatrics (www.aap.org), and the American Academy of Family Physicians (www.aafp.org).

Taken from AAP Website: www.aap.org

Recommended to be updated annually
